## PrincetonSemi-Prep SFC

Our customers for Supercritical fluid chromatographic (SFC) have requested that our analytical columns be matched with preparative columns so the scale up is easy for them. We have answered that call with our newest lines of semi-prep and prep SFC columns. All columns listed here are packed using the same high quality bonded phases as our analytical columns and are checked out individually by SFC. The same quality and reliability our customers know from our analytical columns is delivered here in our semi-prep and prep line.

PrincetonSFC Semi-Prep columns are available with ID's from 10mm to 50mm and in lengths from 50mm to 250mm. All columns are quality controlled by SFC and individual SFC documentation is included with every column.
